GENESIScoin Token Rights and No-Rights Statement

Public statement on GENc functional role and non-rights interpretation.

Version	v2.0 Public Release
Network	BNB Smart Chain
Token	GENESIScoin
Symbol	GENc
Project Identity	SQUNOHOLIX Brand Association - D_LAB
Core Standard	Proof Before Promise
Document Type	Public disclosure / interpretation layer

Public principle: Proof Before Promise. Do not assume. Verify.

1. Scope of this Statement

This statement explains what GENc is intended to represent inside the GENESIScoin system and what GENc does not represent.

It is a public interpretation document. It does not modify smart-contract code, create contractual rights, override on-chain rules or create legal, financial or governance promises.

GENc is the system asset used by the deployed GENESIScoin modules. GENc is not presented as equity, governance, legal dividend, debt, redemption claim or profit-share right.

2. Token Identity

Field	Value
Token name	GENESIScoin
Symbol	GENc
Network	BNB Smart Chain
Standard	BEP-20 / ERC-20 compatible
Token contract	0x8d9f95Dd624F581803e06652623897DfeCB82CA6

3. Functional Role of GENc

GENc functions as the base token and system asset around which GENESIScoin modules operate.

GENc may be used by or connected to PreSaleGENc, PublicSaleGENc, Asset Manager v1, Asset Manager v2, RM01, tracking systems, distribution mechanisms and liquidity allocation structures according to the deployed system logic.

Any user interaction with a module depends on the relevant contract state, eligibility logic, timing, configuration and execution path.

4. Contract-Level Eligibility Is Not a Legal Right

Some GENESIScoin modules may define eligibility rules, holding conditions, whitelist logic, distribution paths, bonus mechanics, tracker states or scheduled releases.

These mechanics are technical system rules. They should not be interpreted as legal entitlement, equity right, income right or claim against an issuer.

5. No Equity or Ownership Rights

Holding GENc does not grant equity ownership in SQUNOHOLIX Brand Association, D_LAB, GENESIScoin or any related project entity.

GENc does not represent shares, membership interests, partnership interests or ownership of company assets.

6. No Governance Rights

Holding GENc does not grant formal governance rights unless a deployed and verified governance mechanism explicitly exists and grants such rights through on-chain rules.

This statement does not present GENc as a governance token.

7. No Legal Dividend, Yield or Profit Share

GENc does not provide a legal dividend, profit share, yield product, income right or guaranteed return.

The term DividendGENc is a technical system label for GENc token distribution from a dedicated pool through tracker, verifier and contract execution paths.

DividendGENc should not be interpreted as a legal dividend or financial income product.

8. No Redemption or Buyback Right

Holding GENc does not create a right to redeem GENc for fiat currency, BNB, another crypto-asset or any other asset from the project.

Holding GENc does not create a guaranteed buyback obligation.

9. No Claim Against Treasury, Liquidity or Reserves

GENESIScoin documentation describes allocations, custody, release logic and module roles.

Holding GENc does not create a direct legal claim against treasury allocations, LP Main, LP Backup, Asset Manager v1, Asset Manager v2, RM01, Partners allocation, airdrop pools or any reserve wallet.

10. No Guaranteed Rewards or Continued Distributions

Distribution mechanisms such as B100D, DividendGENc, airdrops, PublicSale bonuses or AMv2 routes depend on contract state, eligibility rules, available pool balance, timing, operational triggers and system conditions.

A technical distribution path does not guarantee future rewards, continued distributions or fixed user outcome.

11. No Guaranteed Trading or Liquidity

LP Main and LP Backup are liquidity allocation wallets. They do not, by themselves, prove active liquidity, live trading, locked liquidity or LP Manager custody.

Stage 1 50% sold is a structural liquidity/trading activation threshold. It is not a guarantee of immediate trading or guaranteed liquidity.

Active liquidity must be verified through actual on-chain liquidity transactions and pair state.

12. No Exchange Listing Right

Holding GENc does not create any right to exchange listing, exchange support, DEX interface support, market making, liquidity depth or third-party integration.

13. No Consumer, Service or Access Guarantee

Holding GENc does not automatically guarantee access to a product, service, event, platform feature, support service or future ecosystem benefit unless a deployed system mechanism explicitly provides such access under defined conditions.

14. Documentation Does Not Create Rights

Public documentation explains the system architecture, allocation model, execution paths and interpretation rules.

Documentation should not be read as creating rights beyond what is defined by deployed contracts and current system state.

15. Summary Table

Question	Answer
Does GENc represent equity?	No.
Does GENc grant ownership rights?	No.
Does GENc grant formal governance rights?	No, unless a future deployed governance mechanism explicitly defines this.
Does GENc grant a legal dividend?	No.
Is DividendGENc a legal dividend?	No. It is a technical GENc distribution label.
Does GENc guarantee yield or profit?	No.
Does GENc guarantee liquidity or trading?	No.
Does GENc create a redemption claim?	No.
Does GENc create a claim against reserves?	No.

16. Verification Rule

GENESIScoin follows Proof Before Promise. Any claim should be checked against deployed contracts, public addresses, transaction history and current chain state.

Do not assume. Verify.
